Project Compass - Your client's letter of 12 January 2026

Dear Dr. Herrmann,

We act for Marchmont Dynamics Ltd. We have reviewed your client's letter of 12 January 2026 purporting to withdraw from the Master Services Agreement dated 14 May 2024.

Our client does not accept that it was in default. The defect that arose over the Go-Live weekend was identified within approximately fifteen minutes and a tested patch was deployed by the evening of 30 November 2025, as our client's own project-channel records show. Your client's own delay in supplying the legacy master data extract, received only on 6 October 2025, materially compressed the testing window available before cutover.

Our client rejects the purported withdrawal as unjustified and reserves all of its rights, including payment in full of invoice INV-2025-0138 of 5 December 2025 in the amount of GBP 89,700.00, together with its right to claim indemnification under Clause 20a of the Master Services Agreement and Article 377 of the Swiss Code of Obligations.

Yours sincerely,

Dr. Priska Wenger
